

MEMORANDUM

JRS ENGINEERING CONSULTANT, LLC

TO: Chuck Reid, Manager - CCBWQA
CC: Rick Goncalves, Chairman, TAC
FROM: James R. "Jim" Swanson, P.E.
DATE: October 10, 2018
SUBJECT: Peoria Pond Interpretive Sign Replacement

BACKGROUND AND EXISTING CONDITION:

In November 2017, the City of Greenwood Village contacted the Cherry Creek Basin Water Quality Authority (Authority) regarding the interpretive sign located at the Peoria Street Detention / Wetland Pond. It was noted that the sign was deteriorated and severely weathered, See Photo 1. Following some research, it was found that the interpretive sign was installed with the pond construction in 2002. Project partners listed on the sign were:

- Arapahoe County.
- Arapahoe County Water & Wastewater Authority.
- Cherry Creek Basin Water Quality Authority.
- Cherry Creek Stewardship Partners.
- City of Greenwood Village.
- Havana Water & Sanitation District.
- Urban Drainage & Flood Control District.

REPLACEMENT SIGN:

ECOS Communications, the same company who manufactured the interpretive signage located within the Cherry Creek State Park, manufactured the three-panel interpretive sign shown in Photo 1. As part of the Authority's commitment to provide educational information regarding PRFs to the public, the Authority contracted with ECOS to manufacture a new replacement sign for the Peoria Pond, See Photo 2.

In continuing our partnership with our member agencies, the Parks and Recreation Department in Greenwood Village volunteered to remove the deteriorated sign panels and install the new sign panels.
